

Lorentz-equivariant flow matching models for jet generation

Arjun Sharma

August 6, 2025

Current architecture

Current status

Remaining steps

1. Debug the output of the model to improve performance
2. Implement successful techniques from flow matching for image generation [1, 2, 3] as novel contributions to jet generation
3. Submit a paper to the NeurIPS ML for Physical Sciences workshop by August 29th

Temporary page!

L^AT_EX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because L^AT_EX now knows how many pages to expect for this document.
